ECCO GOLF WOMEN'S COLLECTION	20
S-LITE	28 32 30

PREMIUM MATERIALS

- ECCO's RICH TWO-TONE YAK, crafted in our own tanneries, is an extra strong, durable, thin and modern leather. It is perforated on the forefoot, with a natural touch, sporty surface that has equal amounts of matte and shine, and offers excellent breathability.
- GORE-TEX® Surround® offers 100% waterproof construction and 360° breathability, to keep your feet dry and comfortable.
- Double layer neoprene sock eliminates the conventional movable tongue. It cushions, adapts to the foot and wraps the heel in stretchable softness for ultimate ease and comfort.
- Perforated and breathable textile, inlay sole - designed to work in conjunction with GORE-TEX® Surround® - offers extra width if removed.
- Fine-grain ECCO calf crust leather detailing adds depth, warmth, and a premium touch.

INNOVATIVE COMFORT

 ECCO FLUIDFORM™ Technology, ensures a finely tuned balance of cushioning and rebound creates an integral, flexible and durable bond

- without the compromises common with conventionally stitched and/or glued assemblies.
- Built on ECCO's skilfully designed, BIOM® last that is based on the natural shape and movement of the foot.
- Anatomical fit to support the natural form of your foot, with an embracing, glove-like fit.
- Reduced seam construction for lightweight flexibility.
- Low-to-the-ground sole structure provides a natural position for the foot and excellent ground responsiveness, allowing you natural motion and better stability and control.
- ECCO Tri-Fi-Grip™ outsole ensures multipurpose zonal performance for excellent grip, stability, durability, flexibility and exceptional comfort. Ultra-durable T.PU withstands wear on and off the course, without affecting performance.
- Our 2nd generation Golf T.PU EXHAUST GRID, built into the midsole of the shoe. with larger, angled openings scoops air in and channels it directly to the sole of your foot while also allowing moisture and heat to escape, for ultimate breathability.
- Option of BOA performance fit.

ECCO GOLF BIOM® COOL PRO MEN'S

A unique combination of highly innovative technologies gives you exactly what you need most on the course — in all conditions. Built on ECCO's exclusive BIOM® last, ECCO BIOM® COOL PRO utilises our pioneering FLUIDFORM™ Technology to frame and anatomically support your foot, while bringing you closer to the ground to provide natural motion and better control. TRI-FI-GRIP™ outsole ensures multi-purpose zonal performance through three segments; one for stability, another for durability and a third for rotational support.

GORE-TEX SURROUND® construction, paired with our advanced T.PU EXHAUST GRID built into the midsole, leads fresh air directly to the sole of your foot, while simultaneously allowing heat and moisture to escape. Matched with thin, perforated ECCO YAK leather, this powerful combination provides 360° breathability and 100% waterproofing to let you perform comfortably from the first tee to the 18th green, and beyond.

PREMIUM MATERIALS

- ECCO soft full grain calf leather crafted in ECCO's own tanneries.
- Tight hand and matte smooth surface texture.
- An exclusive, ECCO-developed treatment for making shoe uppers waterrepellent, HYDROMAX® helps provide strong, durable and highly breathable leather uppers. As well as helping keep feet dry and comfortable, HYDROMAX® also keeps the upper soft, supple and breathable, preventing it from hardening after repeated exposure to wet conditions.
- Sections with leather lining, which is micro-perforated to offer natural breathability and moisture management properties with maximum comfort.
- Removable, washable Ortholite® foam inlay sole provides long-term cushioning and enhanced breathability, plus the option of extra width when removed.

INNOVATIVE COMFORT

- All-new PU PHORENE™ midsole, offers unparalleled softness: lighter at the same volume than ECCO's current PU.
- Provides high levels of shock absorption increases rebound by returning more energy than our current PU.
- ECCO FLUIDFORM™ Technology, ensures a finely tun-ed balance of cushioning and rebound creates an integral, flexible and durable bond without the compromises common with stitched and/or glued assemblies.
- Award-winning E-DTS hybrid outsole design adds more than 800 traction angles for excellent grip in all playing conditions. Constructed from highly durable thermoplastic polyurethane (T.PU) and consisting of more than 100 moulded traction bars, the outsole unit is extremely lightweight, flexible and shock absorbing.

ECCO GOLF S-CLASSIC MEN'S

PURE COMFORT WITH CLASSIC DESIGN

Classic golf shoes have always played an important role in golf footwear, and with ECCO S-CLASSIC GOLF have developed a pioneering shoe which combines the best of a traditional looking golf shoe with a comfortable and contemporary platform. Golfers who prefer the classic look and are loyal to the traditions of the game will enjoy the design but benefit from the innovative new PU PHORENE™ midsole, which provides great performance. Its introduction signifies a giant leap in ECCO's FLUIDFORM™ process, with a lighter weight to volume ratio, an increased shock absorption and energy rebound than ECCO's current PU. Uppers are crafted from ECCO soft full-grain calf leather made in ECCO owned tanneries and deliver a luxurious appearance, with 100% waterproof GORE-TEX technology keeping feet dry and comfortable in all conditions. An award-winning, ECCO DYNAMIC TRACTION SYSTEM (E-DTS) outsole design provides more than 100 traction bars and 800 traction angles for excellent grip in all playing conditions, and a removable, washable Ortholite® foam inlay sole provides long-term cushioning and enhanced breathability.

ECCO GOLF S-LITE MEN'S

Taking a fresh and innovative approach to golf shoe design, ECCO S-LITE blends cutting-edge engineering and comfort to ensure an ultralight on-course experience.

Lightweight ECCO RICH TWO-TONE YAK leather uppers lined with a soft textile provide natural water repellent properties and breathability.

The ground-breaking E-DTS™ LITE outsole offers award-winning grip and unrivalled flexibility that still packs a punch with on-course traction.

An innovative multi-injection production process has enabled ECCO GOLF to design a base that's 66% thinner than any other T.PU outsole that the company has previously created, making it the perfect packable playing option for overseas travel, or for an after-work twilight round on a hot summer's day.

Size range: 39-47 Leather: Racer Yak

ECCO GOLF STREET RETRO MEN'S

ECCO STREET RETRO is inspired by the original design that Fred Couples famously wore at the 2010 Masters, and successfully combines timeless styling with an array of advanced performance technologies.

Featuring our all-day outsole that marked one of the most significant advances in the history of golf footwear — with awarded-winning ECCO DYNAMIC TRACTION SYSTEM™ (E-DTS™) adding grip and traction without the weight.

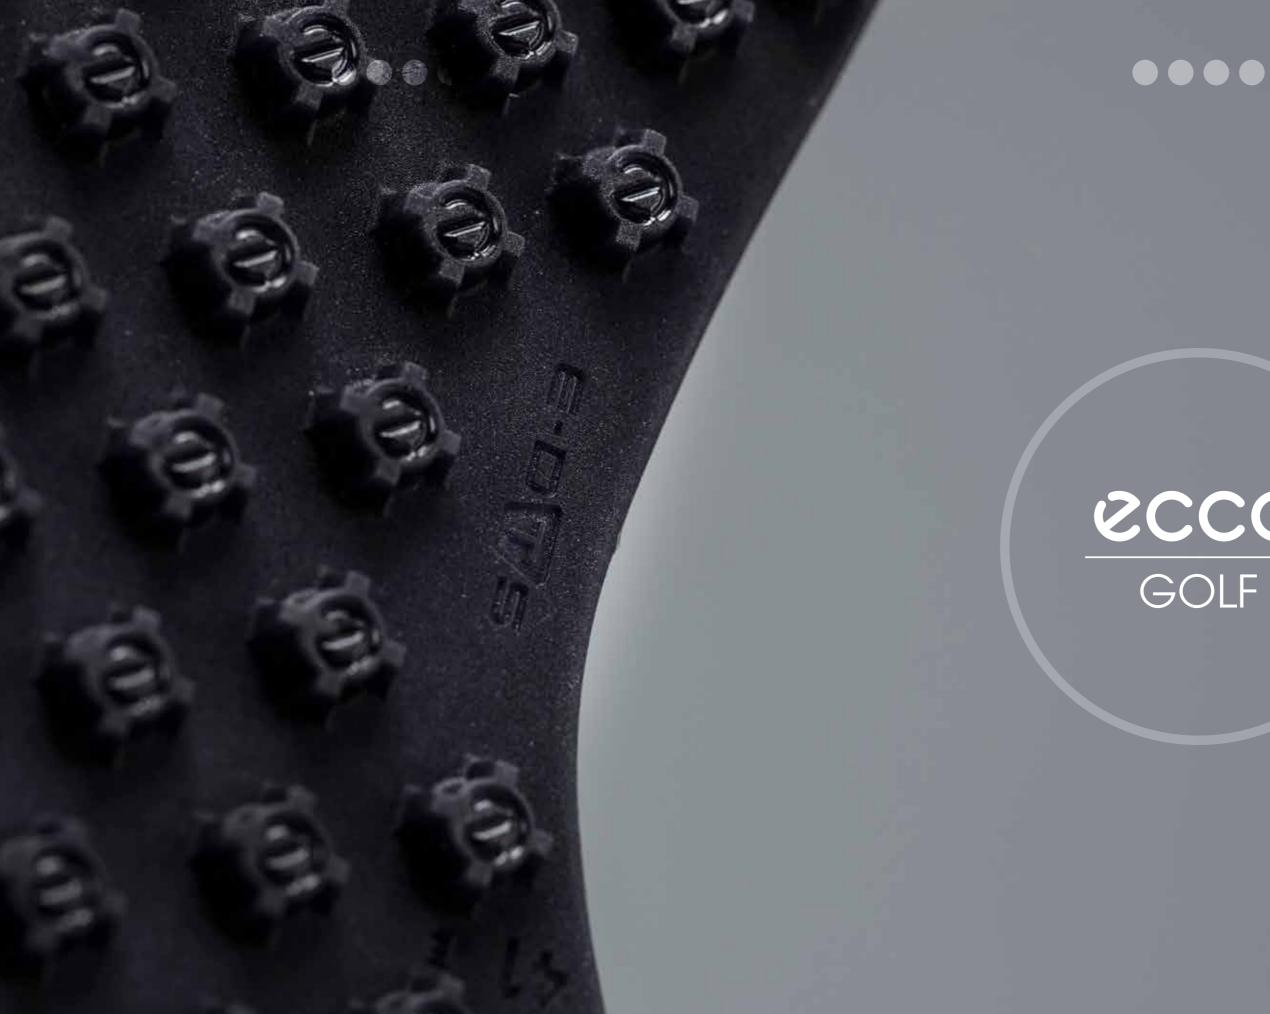

A luxurious, ECCO HYDROMAX™ treated leather upper sits atop a lowprofile, ECCO FLUIDFORM™ technology PU midsole, providing trendy, sneaker-style aesthetics in four classic colour options for those that favour a more casual look.

ECCO GOLF COOL PRO WOMEN'S

PLAY IN BREATHABLE COMFORT

Whether you're strolling down the fairway, trudging through the rough or sinking a winning putt on the 18th hole, this modern golf shoe design has you covered. Expertly using FLUIDFORMTM Technology and a GORE-TEX SURROUND® structure to make a breathable and waterproof shoe, while our ECCO Dynamic Traction SystemTM (E-DTSTM) adds precision sole engineering to provide exceptional support and comfort for a long day on the green. 100 moulded traction bars on the E-DTSTM outsole ensure superior grip in all playing conditions and help anchor feet during each round, while the hard-wearing ECCO yak leather has become a stand-out signature for ECCO Golf with its natural water repellent properties and breathable strength. Diamond shape embossing add are adding a fresh look and enhanced breathability.

From back-swing to follow-through, you will be cool from every angle.
